

Minifalcon II

- Tactical UAS
- State of the art structural design, all composite construction.
- Advanced aerodynamic design – high performance airframe
- Light airframe, empty weight - 65Kg
- Long duration - 15Hr
- Large payload capabilities - 35Kg
- Two available engines
- DH290 / UEL741

***Naviator* Ground control station**

- Modern, highly capable windows based interface
- Miniature design, highly portable
- Synchronized data and telemetry recording and playback
- Special flight and mission analysis tools
- NATO STANAG 4586
- Level 5 compliant
- Multi level control over AV and mission:
 - Flight control
 - Payload control
 - Mission control
 - Multi UAV control
